Player Objective

The player picks a character to journey through the land of TBD, The game has a dark setting with graveyards, bogs, villages, old cathedrals and dungeons. Through exploring the world and killing enemies the player gets stronger and build allegiances with the lands factions, some factions are neutral in their allegiance while others are sworn enemies and helping one faction will cause the other faction to become increasingly hostile to the player until eventually they will attack the player on sight. After traversing through the world you will eventually have to go to war with the opposing faction and wipe out their leader.

Player Progression

Players progress through the game by killing enemies, getting xp from defeating them and gathering resources like money and equipment to further improve their character. As they gain

XP they will slowly level up and be able to enhance their skills as they progress throughout the game.

Players can use the money and items they collect to sell and trade with merchants. Merchants will have various inventories at different parts of the game, with earlier merchants having weaker/cheaper equipment. Defeating certain enemies will drop certain items from a loot table, with percentage chance for drops. Bosses and more challenging mobs will have a chance to drop more powerful items or equipment.
