HIGHLIGHT of QUALIFICATIONS

- Computer Science student specializing in full-stack application development with hands-on experience building mobile applications, website platforms, and game development. I have a strong foundation in software engineering fundamentals, including feature development, thorough application testing, and user interface design, through academic projects that deliver user-focused applications.

TECHNOLOGY SKILLS

- Programming Languages: Python, C#, SQL, Kotlin, Java, JavaScript, HTML, CSS, XML
- Web Tech and Frameworks: React, Node.js, Express, REST APIs
- Tools: Git, GitHub, Visual Studio, Android Studio, Figma, Canva
- Engines: Unity

EDUCATION

Bachelor of Science - Computer Science Major

Expected to graduate June 2026

MacEwan University

Course Highlights:

Introduction to Software Engineering - CMPT 395

- Specialized in software engineering concepts, including software design, development, analysis, and testing.

The Final Project - CMPT 496

- Planned, developed, and presented an independent software project under faculty supervision, applying software engineering and problem-solving principles.

RELATED EXPERIENCE

Mobile Software Application for Tutoring - Comtutor

Jan 2025 - Apr 2025

- Researched other tutoring applications to identify must-have features and prioritize them in development
- Designed front-end pages and UI components using Figma, to ensure that the design, color, and theme were consistent with other project elements to enhance user experience
- Engineered the coding for each front-end component in Android Studio using Kotlin and XML, collaborating with back-end developers to facilitate the seamless functioning of database systems
- Troubleshooted all issues identified through testing by brainstorming and researching possible solutions, improving the overall stability and functionality of the application
- Collaborated with the professor as the client throughout the key stages of development, ensuring that the application meets the user expectations and aligns with the initial project goals

Application for Property Values In Edmonton - Edmonton Property Search

Sept 2025 - Dec 2025

- Built a data-driven search engine with an interactive map that used the ArcGIS API, enabling end users to efficiently have access to property details, including value, address, and features across Edmonton
- Processed and organized over 440K lines of property data and presented them in an easy-to-understand format for the end users
- Designed and implemented intuitive UI controls using JavaScript to improve navigation, ensuring a good user experience and usability

VR Application for Advanced Chemistry Education - Virtual Vials

Jan 2026 - Apr 2026

- Researched Newman projections, molecular structures, and diagrams to ensure accurate representation of chemical structures in 3D
- Developed an immersive VR chemistry learning application in Unity using C#, enabling end users to interact with and visualize molecular structures, promoting a more involved and engaging learning experience
- Conducted surveys for the participants and evaluated user feedback to assess the application's effectiveness, and used that data to improve user experience and usability
- Demonstrated the final product to instructors and peers, highlighting application features, user testing results, and project conclusion, resulting in effective communication of the project completion
- Documented application features and design, including overview, mechanics, controls, and project outcome and impact to support future development

Wildfire Information Dashboard in Alberta - FireWatch

Jan 2026 - Apr 2026

- Programmed a full-stack web application using React, Node.js, and MongoDB, enabling users to have access to wildfire locations across Alberta
- Implemented user authentication using MongoDB, supporting reliable login, signup, and contact functionality for users
- Designed and deployed responsive frontend pages and interactive data, making it easy for users to access wildfire location and information

EMPLOYMENT EXPERIENCE

Comfort Care Aide

Jun 2023 – Present

Northcott Care Centre, Ponoka, AB

- Collaborated with nurses and healthcare aides to support resident care, ensuring proper care is delivered
- Documented and communicated resident behaviors to registered nurses in written reports, strengthening formal documentation and attention to detail

Dietary Aide

Jun 2022 – Jun 2023

Northcott Care Centre, Ponoka, AB

- Collaborated with healthcare aides to ensure correct and timely meal delivery, supporting consistent service in a fast-paced environment
- Communicated with the residents to describe menu options and served a meal according to their diet plans

CERTIFICATES

C# Unity Game Developer 2D

Oct 2024

Online Course – via Udemy
