

CMPT 315 Group Project – Proposal Document

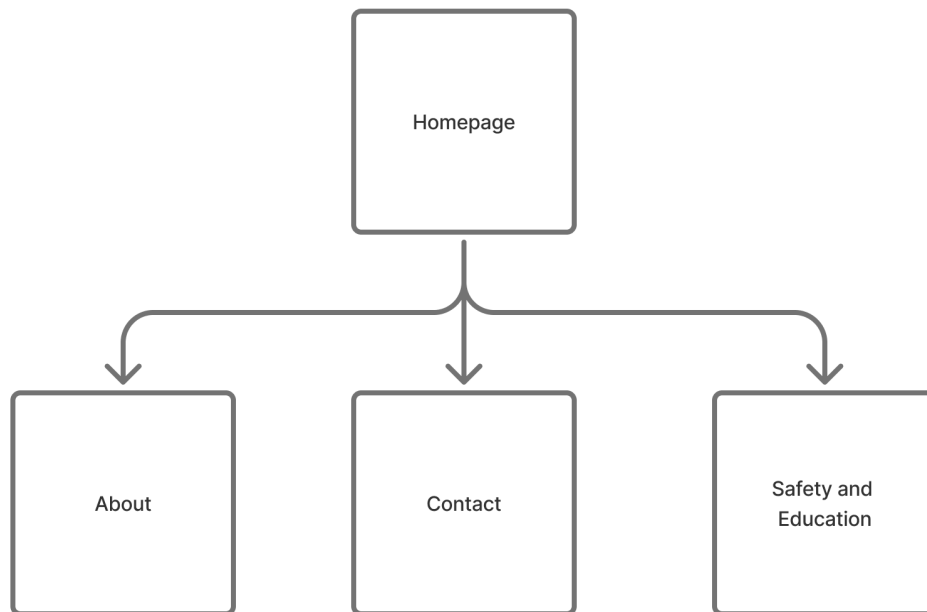

Project: Wildfire Information Dashboard (Alberta)

1) *One-Page Proposal*

- Overview
 - This project proposes the development of a web-based platform to provide forestry teams with wildfire data locations to help them make informed decisions. The system will mainly support one user role, providing information that could be used by forestry management services and public users as well.
- Users
 - Forestry Management Services:
 - Monitor areas that are at risk of a wildfire.
 - Observe current wildfire locations.
 - Guide forestry teams on which areas to avoid.
 - Admin:
 - Update wildfire status
 - Public Users:
 - View information about wildfires in the area.
 - Observe weather locations related to each wildfire area.
- MVP Scopes
 - Homepage
 - Overview of the project.
 - Navigation bars that redirect the user to other pages.
 - Map Page
 - An interactive map displaying red zones that represent active wildfire(s).
 - Yellow zones representing areas that are at risk of a wildfire.
 - About Us Page
 - Staff names and introduction.
 - State the project's mission values.
 - Contact Page
 - A form that asks the user for their name and contact details, along with their inquiries.
 - Link to social media pages.
 - Login Page
 - Users can login using their email and password.
 - System validates whether the email or password is correct.
- Rules
 - Contact form requires a name and email address to be submitted.
